REMARKS

25X1

1. An airfield is 1.8 km southeast of Vysoke Myto (0 50/N 08), just northeast of the road to Litomysl (0 50/N 17). A firing range, two guard-houses, watchtowers and a concrete taxiway (sic) 100 meters long were located in the woods northeast of the field. Two concrete taxiways lead from two hangars on the edge of the woods to a concrete strip about 15 to 20x400 meters. *
2. There was intensive daytime flying. Sports planes and aircraft of other types were parked in the southern section of the field. **
3. Two air force barracks buildings, one known to be used as a pilot school, were located in Vysoke Myto. ***

25X1

* Comment.

For sketch of field, see Annex. The sketch agrees with the previous report as to the two hangars and the firing range.

25X1

** Comment. The field is used by sports planes, but training flights and occasional flying activity are also conducted there by the 1st AF Repl Regt stationed in Vysoke Myto.

25X1

1 Annex: Vysoke Myto Airfield.
